A Legacy of Success

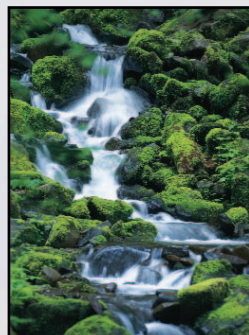

Alternative fuel technology rolls on.

As efforts to reduce the nation's reliance on petroleum continues, the demand for Alternative Fuel Vehicles (AFVs) and associated fuels is expected to accelerate over the next decade. Americans are beginning to understand that reliance on a single source of transportation energy is unwise due to declining foreign oil reserves, supply cutbacks and geo-political strife. Demand for vehicles powered by CNG/LNG, as well as gasoline-fueled hybrids is expected to grow substantially in the coming years. Flexible fuel vehicles that operate on ethanol (E85) or gasoline are also expected to increase as additional E85 fueling stations are constructed. Finally, many experts believe that hydrogen fuel cell vehicles could displace internal combustion powered vehicles as the primary mode of transportation within 20-25 years.

Whatever direction the alternative fuel industry takes, you can be assured that Fiedler Group will continue to be the company that both private and municipal organizations turn to for professional support in negotiating the complex municipal regulations and hurdles associated with implementing this new technology. Fiedler Group specializes in development of methanol/ethanol, CNG, LNG and hydrogen fueling facilities as well as modifications to maintenance facilities that service alternative fuel vehicles.

Our industry history is unmatched.

Since 1957, Fiedler Group, formerly Fred Fiedler and Associates, has provided premier architectural and engineering services to a broad spectrum of industries including alternative energy, petroleum and food services. Founded by Fred Fiedler, former Manager of Engineering and Construction at Union Oil Company, Fiedler Group has become a leading architectural, engineering, planning and program management firm to more than 25 major U.S. petroleum/alternative fuel marketers. With demand for alternative sources of energy increasing, Fiedler Group continues to be the company that industry relies upon to initiate fast-track design and municipal approval of alternative fueling and maintenance facilities.

Fiedler Group maintains three offices throughout California (Concord, Irvine & Los Angeles) in addition to temporary project offices covering 10 Western States. Fiedler Group's proximity and knowledge of markets where alternative fuel vehicles offer the greatest impact in reducing the nation's reliance on petroleum fuels make them an ideal resource when infrastructure development and market expansion are desired.

Fiedler specializes in the following areas:

- Alternative Fuels
- Methanol
- CNG / LNG
- Hydrogen
- Fueling Systems
- Retail Station Fueling
- Airport Fueling
- Marina Fueling
- Fleet Fueling
- Truck Stops
- Travel Centers
- Maintenance Facilities

Comprehensive Services.

Fiedler Group is comprised of a multi-disciplined staff providing a comprehensive range of professional services to guide your project from vision to reality. Selected areas of expertise include:

- Feasibility studies
- Permit and Entitlement Services
- Architectural Design
- Civil Engineering
- Mechanical, Electrical & Plumbing Design (MEP)
- Landscape Architecture
- Project / Program Management
- Bid and Procurement Services
- Construction Management
- Hazardous Materials Management
- Risk Management Planning
- Emergency Response
- Safety Planning

Insight, Knowledge, Experience.

When you partner with Fiedler Group, you're working with Project Managers and Principals who have years of experience in your industry. We take the time to understand your particular needs and treat your project as if it were our own. It's this "hands-on" attention that differentiates Fiedler Group from the competition. We also maintain solid relationships with hundreds of county and municipal contacts to ensure fast and efficient planning and building permit acquisition.

Innovative Technology.

At Fiedler Group, we understand that technology is crucial to managing complex projects and programs. Properly utilized, it can speed design and expedite quick turn-around of permit approval. To that end, Fiedler Group has developed a customizable software application called "PTS" (Project Tracking System) that allows for precise management of financial, schedule and permitting information at both the project and program level. Our clients may access their specific program information via secure Internet access. Combine this with three-dimensional design, smart drawings, computer-aided facilities management and project modeling and you have complete control of your project.

We serve the best in the business.

At Fiedler Group, we are privileged to count clients from within the Fortune Global 500 in addition to small companies and individual entrepreneurs. Our client list includes industry leaders from petroleum companies and food service retailers to restaurant chains and government agencies. We create value and assist our clients in identifying and capitalizing on their most important business opportunities through our industry knowledge, service offerings and insight into existing and emerging technologies. We believe it's important to understand your business objectives, your project's unique goals, and your vision of success.

Our commitment.

Fiedler Group remains committed to offering architectural, engineering, planning and project management services of outstanding value. We understand that our success is dependent on that of our clients. Thus, we continue to assemble the finest professional staff and pertinent technology to insure our client's vision becomes a reality.
